

Renewable Diesel: Diesel of the Future, Today

Switching to an alternative fuel doesn't have to be hard. Join us at the **NorCal Clean Fleet Technology Conference & Expo** for a pre-conference seminar to explore the benefits of Renewable Diesel.

EASY TO SWITCH. Learn about how Renewable Diesel is a drop-in replacement for CARB diesel and meets the ASTM D975 diesel specification. Switching requires no changes to your current equipment and infrastructure.

SUSTAINABLE. Information on how Renewable Diesel is a fossil free diesel made from 100% sustainable raw materials that can reduce your fleet's greenhouse gas emissions by up to 80%.

BETTER FOR YOUR FLEET. Learn about the differences of Renewable Diesel, CARB Diesel, and Biodiesel. Also, how Renewable Diesel will reduce maintenance costs, downtime, and help eliminate filter and injector problems in your fleet.

Come learn more about Neste MY Renewable Diesel with North America's Technical Manager, Matt Leuck and local distributor, Van De Pol Petroleum. For more information, visit vandepol.us
